Welcome to the World of Accuracy

EV 90DM Portable Double Miter Bandsaw

The new Model 90DM Bandsaw is a unique blend of cutting capacity and versatility. Weighing 75 pounds the Model 90DM is rugged enough to stand up to tough conditions but light enough to go anywhere. Overall dimensions of 27" long, 14.5" wide and 19" high allow the EV 90DM to be used in some tight spaces. What other bandsaw gives you 6" cutting capacity in this small a package? But the best part is the double miter capability! Look closely at the photos and see how the unique, double miter design of the Model 90DM could help you when you need it!

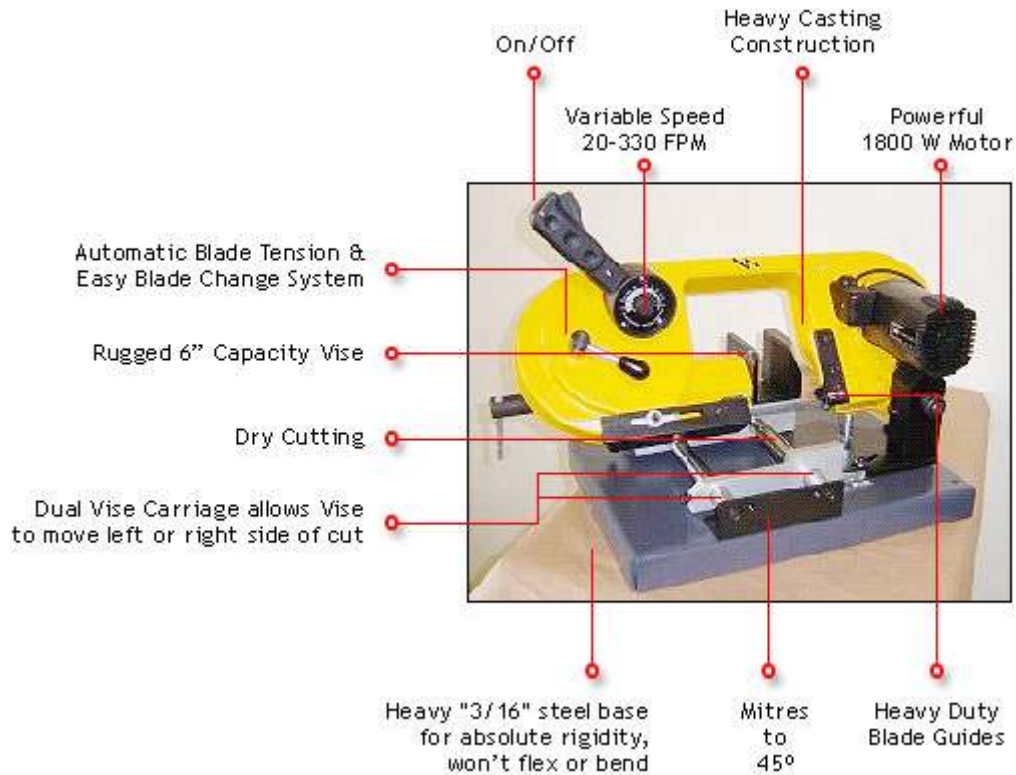

EV 90DM Bandsaw right and left end

The Model 90DM has all the features of our other band saws - heavy duty solid casting construction of the bandsaw bow - crucial for accurate cutting. Precision machined components provide moving parts that work smoothly for years.
